

Protecting Your Most Important Interests (TBBs) – List of all sectors

Long list

Financial interests	Type of companies
Integrity of financial data Availability of budgets and forecasts Confidentiality of payroll administration Confidentiality of banking data and transactions	Accountant Administrative office Consultancy (specific financial advice) Tax advisory firms Financial advisory firm IT consultancy (data and financial software management) Custom software company M & A Companies Notary office Payroll company Pension consultancy Software company (financial software) Software development company Employment agency (financial personnel) Recruitment and selection agency (with payroll administration)

Examples of risks per sector for financial interests

Accountants and administration firms - Direct access to client financial data and documents. This can lead to tax inspections and fines.

Tax advisory firms and financial advisory firms - Dealing with confidential financial strategies and documents. Seriously damaging client confidence and leading to litigation or fines from regulators.

IT consultancy and software companies - Potential access to financial software, client data and databases. This can lead to fraud, loss of clients and fines for non-compliance with regulations such as GDPR.

Payroll company - Confidentiality of payroll administration and budgeting. Incorrect salary payments, tax issues for clients and insufficient protection of payroll data.

Notary office - Management of financial transactions and sensitive data. Incorrectly shared documents or loss of important ownership papers.

Legal interests	Type of companies
Confidentiality of contracts and agreements Integrity of compliance documentation Confidentiality of legal correspondence Confidentiality of intellectual property rights	Consultancy Law firm Agricultural consultancy Construction consultancy Fire safety advice Cloud companies Data center management company Temporary employment agency ICT company IT consultancy (legal documents and systems) Legal advice agency Management consultancy Notary office Organizational consultancy Payroll company Advertising agency Travel agency (business) Software Development Company Technology companies Employment agency Licensing advice agency Web design agency Recruitment and selection agency

Examples of risks per sector for legal interests

Legal consultancy - Processes contracts, agreements and terms of delivery. This can lead to lawsuits or damage to reputation.

Employment agency - Employment contracts contain personal and sensitive information of employees. Careless management can lead to violations of privacy laws, such as the GDPR.

Agricultural consultancy - Assists companies in complying with environmental legislation. If compliance documentation is incomplete or incorrect, this can lead to fines or revocation of permits.

Cloud companies - Companies store confidential emails and legal documents in the cloud. A data breach can expose sensitive information and lead to lawsuits against the cloud company.

Software development company - Develops custom software for a customer. If the source code is stolen, this can lead to loss of intellectual property and revenue.

--	---

Examples of risks per sector for operational interests

Production company (metal) - Downtime in production processes due to a malfunction or cyber attack can lead to financial losses and delays in deliveries.

Port logistics company - Logistics schedules and container information can be misused by criminals or competitors.

Automotive manufacturing company - Interruptions in assembly lines due to parts delivery problems.

Glass producer - Production lines can be shut down due to power outages or machine failure.

Dredging Company - Delays in obtaining materials for projects due to interruptions in the supply chain.

Food producer - Delays in the supply of raw materials due to failures in the chain information.

Train Maintenance Company - Incorrect maintenance documentation can result in defects and delays in rail transport.

Auto Salvage - Lack of access to supplier data can lead to delayed repair parts.

Security interests	Type of companies
Integrity of security procedures and protocols Integrity of access control information Availability of Incident Response Plans Availability of physical security of locations	Alarm installation company Security company Security company Fire safety company CCTV company Explosive Ordnance Disposal Service Hardware suppliers ICT companies Supplier of access batches and software Supplier of hazardous substances Ammunition storage company MSP Network suppliers Storage of hazardous substances Private security Ship security company Software vendors Surveillance company Telecom network company Transport company (for transport of sensitive or hazardous materials) Transport of dangerous goods Hospital facilities company (by processing sensitive medical data)

Examples of risks by sector in Security Interests

Security company - Responsible for protecting buildings, people and sensitive information. Implement security procedures, access systems, alarms and other measures. Can pose security risks to their clients, such as burglary, theft or even terrorist threats.

Hospital facilities company - Manage critical infrastructure, such as medical equipment, patient records and sensitive health information. Unauthorized access to medical data or failures in emergency procedures.

Bomb disposal - Directly involved in the dismantling and disposal of explosives, which is inherently dangerous work. This can result in explosions, injuries or even loss of life. Confidential information about the location of explosives can cause serious security problems in the wrong hands.

Transportation of hazardous materials - Chemicals or flammable materials, pose risks with regard to the physical security of their cargo. Inadequate vehicle security can result in serious environmental damage, fire or explosion. Access to sensitive information about the cargo and transportation routes can result in sabotage or theft.

Reputational interests	Type of companies
Confidentiality of Marketing Strategies Integrity of press releases and communication plans Confidentiality of customer satisfaction reports Availability of social media accounts and content	Accountant Administrative office Consultancy firm Agricultural consultancy Agricultural company Agricultural contractors Alarm installation company Pharmacy Employment consultancy Architectural firm Audiovisual company Car company Car leasing companies Car body repair company Car transport company Car rental Security company Security company Organic farm Organic farming Branding consultancy Fire safety advice Catering for company restaurants Cloud companies Coaching company Consultancy company Data analysis company Data Center Management Company Temporary employment agency Animal feed company Distribution company Beverage wholesalers E-commerce company E-learning company Electrician Electrical engineering company Event agency Event location Event organizer Event catering company Event planner Financial advisory firm Hospitality wholesaler ICT services Innovation consultancy Interior construction company IT consultancy Marketing agency Online marketing agency Organizational consultancy HR Advisor Publicity agency Public communications company PR agency Advertising agency Reintegration company Retail (shops that deliver for business purposes) Software company Software development company Technical consultancy Technical installation company

	Technical service provider Technology companies Telecommunications company Telecom installer Rental company Video editing company Video production company Healthcare institution Healthcare mediation company
--	--

Examples of risks by sector for reputational interests

Video production company - Access to confidential marketing strategies, customer information and social media accounts. Carelessness or data breaches can lead to reputational damage and loss of competitive advantage.

Personnel interests	Type of companies
Confidentiality of personnel files Integrity of medical data Availability of training and development plans Confidentiality of employee correspondence	Accountant Administrative office Employment consultancy Ambulance company Pharmacy Car body shop Security company Security company Coaching company Data analysis company Data Center Management Company Temporary employment agency Dialysis center Financial advisory firm Garage company Hospitality wholesaler ICT company ICT services Youth care institutions Legal advice agency Childcare (large) Childcare with transport service Laboratory Leasing company Medical advice agency Medical equipment manufacturing Medical nutrition Notary office Training company Orthodontic practice Orthopedic shoemaker Payroll company Pedicure (via chain) Pension consultancy HR Advisor Psychologists' practice Psychotherapy practice / Burnout consultants Reintegration company Software company Software development company Training company Employment agency Nursing and care services Healthcare mediation company Healthcare innovation company Healthcare institution Health insurance consultancy Hospital facilities company Hospitals Ambulance transport company

Example of risk per sector in HR interests

Accountants - Access to financial data, including payroll, bonuses and other employee-related payments. A data breach or improper handling of this information could lead to breaches of confidentiality and reputational damage.

Reintegration company - confidentiality of personnel files, integrity of medical data, availability of training and

development plans and confidentiality of correspondence with employees

Strategic interests	Type of companies
Confidentiality of business strategies and plans Confidentiality of merger and acquisition plans Integrity of market analysis and competitive information Availability of innovation and development projects	Accountant Consultancy firm Agricultural consultancy Architectural firm Tax advisory firms Security company Organic farming Construction company Construction consultancy Fire safety advice CCTV company Cloud companies Coaching company Construction company Data analysis company Data Center Management Company Temporary employment agency E-commerce company Energy consultancy Energy company Financial advisory firm Innovation consultancy ICT company ICT advice and consultancy services Infrastructure companies IT consultancy Legal offices Management consultancy Management consultants Marketing agency M & A Companies Mobile communications company Network management company Notary office Oil and gas company Research agency Online marketing agency Organizational consultancy Acquisition advisors Software development company (custom) Strategy consultants Technology companies Telecom network company Real estate consultancy Property manager Real estate maintenance company Real estate painting company Insurance consultancy Web design agency Recruitment and selection agency

Example of risk per sector for strategic interests

Accountant - Sensitive financial analyses and market strategies may be accessed.

Architectural firm - Confidential construction projects and development plans may be compromised.

Tax advisory firms - Insights into tax structures and strategic planning for optimization.

E-commerce company - Competitive information and marketing strategies that are crucial to the sector.

Innovation consultancy - Confidential information about development projects and technological strategies.

Potential access to confidential strategic tools and innovation projects.

Customer interests	Type of companies
Confidentiality of customer data Integrity of sales reports Confidentiality of customer communications and correspondence Availability of loyalty programs and customer profiles	Accountant Battery sales and maintenance Administrative office Consultancy firm Alarm installation company Ambulance company Pharmacy Employment consultancy Security company Security company CCTV company Cloud companies CRM software Data analysis company Data Center Management Company Email programs External sales staff Financial advisory firm Mortgage advice agency ICT company IT consultancy Legal advice agency Childcare (large) Customer research agency Customer software CRM Loyalty software Marketing agency Notary office Research agency Private security Payroll company Software company Software development company Web builders Healthcare mediation company Healthcare innovation company Healthcare institution

Example of risk by sector in client interests

Accountant - Access to sensitive financial data of companies and clients. If this data is not properly secured, it can be exposed to fraud or data breaches, which can have serious consequences for both the client and the company.

Cloud companies - Often manage confidential client data and company information. A poorly secured cloud environment can lead to data breaches or unauthorized access, compromising the confidentiality and integrity of the data.

Innovation interests	Type of companies
Availability of research and development projects Confidentiality of prototypes and blueprints Patent and Trademark Integrity Availability of innovation labs and test environments	Architectural firm Audiovisual company Cloud companies Data analysis company Data Center Management Company Designers Drone maintenance and repair ICT company ICT services Innovation consultancy Installation company IT consultancy Laboratory Marketing agency Trademark Registration Office Patent Office Research agency Designers Design agency Production innovation Manufacturing company (electronics, metal and food) Software company Software development company Technology companies Test company (product testing) Video production company Web design agency Inventors innovation companies

Example of risk per sector for Innovation interests

Software development company - Often working with confidential software and technology designs that are still under development.

Technology companies - Involved in innovative processes, research and development activities. The integrity of patents and the prevention of copying of innovations are crucial. If there is insufficient protection of intellectual property, competitors can easily steal the technology or incorporate it into their own products.

Environmental interests	Type of companies
Integrity of environmental and sustainability reports Integrity of environmental compliance Availability of waste treatment procedures	Waste processing company Agricultural company Agricultural contractors Air conditioning company Asphalt company Commercial real estate agents Organic farming Soil investigation Soil movement Forestry company Construction company Chemicals suppliers Sustainability consultancy Energy company Green energy company Wood production company Infrastructure companies Cable layers Refrigeration company Environmental consultancy Environmental technology company Nature management company Oil and gas company Paper companies (production and import) Recycling company Sewer cleaning company Demolition company City cleaning company Water purification company Water purification plant company Wind energy company Housing association

Example of risk by sector at Environmental Interests

Waste Management Company - Often dealing with the processing of hazardous waste. Failure to comply with the correct legislation and procedures can result in environmental contamination or inaccurate reporting of the amount and type of waste processed.

Oil and Gas Company - Responsible for the extraction and processing of fossil fuels. Careless handling of these processes can result in oil spills or air pollution, and environmental compliance issues can compromise the integrity of their environmental impact assessments.

Water Treatment Company - Crucial for the treatment of waste water to make it suitable for reuse or discharge. Water can become contaminated, which has serious consequences for both the health of the population and the environment.

Supplier and partner interests	Type of companies
Confidentiality of supplier contracts and SLAs Confidentiality of Partner and Alliance Agreements Integrity of joint project documentation Confidentiality of communications with suppliers and partners	Consultancy firm Waste processing company Architectural firm Security company Construction company Cloud companies Consultancy firms Document management software Data Center Management Company Temporary employment agency E-commerce company E-learning company Financial advisory firm ICT company ICT services ICT Suppliers Purchasing cooperatives Purchasing consultants Innovation consultancy IT consultancy Legal advice agency Logistics consultancy Management consultancy Environmental consultancy Marketing agency Notary office Offshore company Oil and gas company Organizational consultancy Government Advisory Agency Project office Project management company Project software Advertising agency Reintegration company Software company Software Development Company / Supplier Technical consultancy Technology companies Telecom network company Rental company (lighting and sound, musical instruments, etc.) Traffic safety company Real estate consultancy Property manager Recruitment and selection agency Web design agency

Example of risk by sector at Supplier and Partner Interests

Management Consulting Firm -. Holds sensitive, confidential information and business strategies. Risk can lead to conflicts of interest and loss of client trust, resulting in reputational damage and potential legal consequences for the firm.

Product related interests	Type of companies
Confidentiality of product designs and specifications Confidentiality of production plans and documentation Integrity of quality control and test data Confidentiality of distribution and sales strategies	Construction companies Agricultural company Agricultural contractors Alarm installation company Ambulance company Architectural firm Audiovisual company Car company Car leasing companies Car body repair company Car transport company Automobile company Concrete company Organic farming Tin producer Construction company Construction consultancy Bread producer CCTV company Catering for company restaurants CNC machining company Canning producer Construction company CV installer for companies Roof and facade systems manufacturer Roofing company Data analysis company Animal feed producer and processor Animal feed company Distribution company Beverage producer Printing house E-commerce company Electrical companies Energy company Event agency Event location Event organizer Export companies Bicycle factory Fruit producer/processor Garage companies Fiber optic installer Vegetable and fruit growing company Vegetable producer/processor Fence maintenance company Hospitality wholesaler Wood processing company ICT services Ice cream producer/processor Import companies Industrial catering company Infrastructure companies Innovation consultancy Innovation companies Installation and plumbing company Installation company Interior construction company Cable diggers

	Cable layers Refrigeration company Plastics production Laboratory Logistics company Machine factory Machine manufacturers Metalworking (business) Furniture factory Mobile communications company Mechanical engineering Machine designers design agency Design agency Paper companies (production and import) Pump installer Precast concrete element manufacturer Production design Production company (electronics) Production company (metal) Production company (food) Product designers Advertising boards (business) Advertising production company Recycling company Ship-building Ship repair company Slaughterhouses Software development company Sports importer Steel construction company Steel processing company Steel recycling company Steel construction company Textile processing company Technical consultancy Technical installation company Test company (product testing) Transport company Inventors agency Packaging manufacturer Food producer or processor Meat and meat products producer Food producer Aircraft maintenance company Floor repair company Transport company Web design agency Wind energy company Seed trade
--	---

Example of risk by sector for Product related interests

Food manufacturer or processor - Impact on public health and the global economy. Confidentiality of recipes, product development, and distribution strategies is essential for both consumer safety and competitive advantage.

Healthcare and medical device manufacturing - Innovations in medical technology and pharmaceuticals have direct implications for public health worldwide. Confidentiality of medical designs, manufacturing processes, and test data is of paramount importance to both the well-being of patients and the integrity of the healthcare sector.

Data protection interests	Type of companies
Integrity of privacy compliance Availability of registrations and reports	Accountant Administrative office Agricultural consultancy Agricultural company Agricultural contractors Pharmacy Employment consultancy AVG consultants Tax advisory firms Security company Organic farm Organic farming Cloud companies Data analysis company Data Center Management Company Temporary employment agency Animal feed producer and processor Animal feed company Financial advisory firm FG agencies (FG as a service) Health care ICT company ICT services Innovation consultancy Installation technology IT consultancy Youth care institutions Legal advice agency Laboratory Logistics consultancy Speech therapy (chains/large practices) Medical advice agency Medical equipment manufacturing Medical nutrition Environmental consultancy Environmental technology company Notary office Oil and gas company Research agency Online marketing agency Organizational consultancy Orthodontic practice Pension consultancy HR Advisor Project office Project management company Psychologists' practice Psychotherapy practice Public Relations companies Registration service Reintegration company Software company Software development company Technical consultancy Technical installation company Technology companies Real estate consultancy Property manager Recruitment and selection agency Healthcare mediation company Healthcare innovation company

	Healthcare institution Health insurance consultancy
--	--

Example of the risk per sector for Data protection interests

Healthcare, including hospitals and care institutions - Ensuring the quality of healthcare. The confidentiality of patient information, medical data and treatment methods is essential for ethical healthcare provision and public health.
